

January 21, 1993

Present Barbara Clancy

7p.m.-Opened bids for drilling of the wells at the Landfill. Richard Cox and three of the bidders present. Bid were opened and Richard Cox took them to review and recommend at our next meeting which one or ones we should consider. There were fourteen bids in all.

Mr. Cox submitted his report for the Landfill.

8:30 p.m. Mark Farrell (inspector) Brenda and Tim McElroy and Edwin Blondin were present to discuss the septic problem in their neighborhood and to discuss with us some possible solutions. Walter Walton had also been requested to be present but his work schedule prevented him. He told me he would cooperate in any manner we deemed necessary.

It was agreed to talk with Leonard Rice and get his permission to check and dye his system. Then to proceed with each dwelling in question to determine which pipes in the ground are connected to what.

I agreed to call Walter Walton in the morning and see if he would agree to a visit from Mr. Farrell.

We ended our discussion at 9:30p.m.

Respectfully,

*Barbara Clancy*

Barbara Clancy, Chairman
