Tropical Storm Irene after action report -

Staff was kept aware of the storm as it approached and its possible impact. Ambulance equipment, supplies, and fuel level were confirmed the day before storm impact.

Crews increased to three during two shifts during and immediately after the storm. Staff was in-house during the height of the storm.

There were no calls for service during the storm. One person did require emergency transportation the next day because the power outage made her go without breathing therapy devices.

EMS and Dispatch were kept aware of road closures, power outages, and hazards.
